

VIRGINIA ELECTRIC AND POWER COMPANY  
RICHMOND, VIRGINIA 23261

March 31, 1980.

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
Attn: Mr. A. Schwencer, Chief  
Operating Reactors Branch No. 1  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Serial No. 297  
LQA/WRM:rab  
Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Dear Mr. Denton:

AMENDMENT TO OPERATING LICENSE  
SURRY POWER STATION UNIT NOS. 1 AND 2  
PROPOSED TECHNICAL SPECIFICATION CHANGE NO. 84

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requests an amendment, in the form of changes to the Technical Specifications, to Operating License Nos. DPR-32 and DPR-37 for the Surry Power Station, Unit Nos. 1 and 2. The proposed changes are enclosed and have been designated as Change No. 84.

As a result of the management reorganization of April 1, 1980, changes to Section 6.0 ADMINISTRATIVE CONTROLS are required to reflect the organization of a Nuclear Operations and Maintenance Department and a Nuclear Technical Services Department. The changes are outlined in the accompanying attachment.

Technical Specification Figure 6.1-1 has been revised to show the new structure of the Power Operations Department and the revised relationship of the System Nuclear Safety and Operating Committee. Technical Specification Figure 6.1-2 has been revised to show the new structure of the offsite organization for facility management and technical support. Technical Specification Figure 6.1-3 has been revised to show the new structure of the Surry Power Station organization.

As a result of the reorganization, a number of position titles and functions have been changed. Throughout Section 6.0, references to the Director, Nuclear Operations have been changed to Manager-Nuclear Operations and Maintenance. The previous positions of Vice President-Power Supply and Production Operations and Senior Vice President-Power have been deleted from the Technical Specifications. The revised positions of Vice President-Nuclear Operations and Senior Vice President-Power Generation have not yet been appointed; therefore, the two positions are neither referenced in the Technical Specifications nor shown in the organization charts. The Technical Specifications will be revised to reflect these two positions when the vacancies have been filled. In the interim, all previous references to Vice President and Senior Vice President positions have been revised to reference the position of Executive Vice President.

Specification 6.1.C.2.a.1 has been changed to show the revised membership of the System Nuclear Safety and Operating Committee. Specification 6.1.C.2.j also outlines the revised reporting function of the System Committee. Specification 6.1.C.2.k, pertaining to activity records of the System Committee, has been changed to reflect the current vacant Vice President and Senior Vice President positions discussed above.

The proposed changes have been reviewed and approved by the Station Nuclear Safety and Operating Committee and the System Nuclear Safety and Operating Committee. It has been determined that this request does not involve an unreviewed safety question.

We have evaluated this request in accordance with the criteria in 10 CFR 170.22 and have determined that this request involves a single safety issue for Unit 1 and duplicate issue for Unit 2; therefore, a Class III license amendment fee and a Class I license amendment fee are required. Accordingly, a voucher check for \$4,400.00 is enclosed for payment of the fees.

Very truly yours,

*C. M. Stallings*

C. M. Stallings  
Vice President—Power Supply  
and Production Operations
