Docket No. 50-280
License No. DPR-32

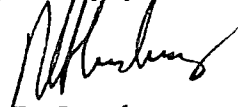

Gentlemen:

SURRY POWER STATION INSERVICE INSPECTION PROGRAM

Pursuant to 10 CFR 50.55a (g), the Virginia Electric and Power Company hereby submits its program for inservice inspection and testing ASME Code Systems during the second ten year interval for Surry Power Station Unit 1.

Per 10 CFR 50.55a (g) (4), the ASME Code and addenda "in effect" for this period has been determined to be the 1980 Edition of Section XI with Addenda thru the Winter of 1980. Surry Power Station was not, however, designed to meet the detailed inservice inspection and testing requirements of the ASME Code, Section XI. Therefore, pursuant to 10 CFR 50.55a (g) 6 (i), we request specific relief from ASME Code requirements pertaining to inservice inspection and testing as outlined on the enclosed attachments.

Very truly yours,

R. H. Leasburg
