Dear Mr. Stewart:

By letter dated January 26, 1983, we requested additional information related to environmental qualification of electrical equipment at Surry Power Station, Unit Nos. 1 and 2. The Safety Evaluation attached to our letter identified two II.B items each on Surry 1 and 2, which were not qualified. We requested that you provide justification for continued operation for these items not qualified.

You provided justification for continued operation February 23, March 1 and 9, 1983. We have reviewed your submittal and our Safety Evaluation is enclosed which concludes that you have acceptable alternate methods for performing the function the unqualified items performed.

Sincerely,

*for* D. Wigginton
