Re: NRC Transfer of Industrial Devices Report: Heuresis Corporation

Dear Sir or Madam,

Per the requirements in 105CMR 120.122(D)(3)(g), Titan Environmental Services, Inc. (TES) has relinquished possession of the following instruments to the manufacturer for resourcing:

Manufacturer	Model #	Serial #	Isotope	Activity	Transfer Date	Received From
Heuresis Corporation	Pb200i	1045	Co ⁵⁷	5 mCi	04/13/2018	General Licensee (TES)
Heuresis Corporation	Pb200i	1056	Co ⁵⁷	5 mCi	04/13/2018	General Licensee (TES)

The instruments were shipped to Brian Carbonneau, of Heuresis Corporation (330 Nevada St., Newton, MA 02458: 617-467-5526); and will remain with the manufacturer until resourcing is complete.

The intended use of these instruments is to conduct lead-based paint risk assessments and inspections.

Please don't hesitate to contact me with any questions or concerns. You can reach me directly at 913-432-5500 (office), , or my e-mail at kgranger@titankc.com.

Respectfully Submitted,

Karla Granger
Environmental Scientist/RSO
