November 30, 1983

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
Attn: Mr. Darrell G. Eisenhart, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Serial No. 045B  
NO/WDC:acm  
Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

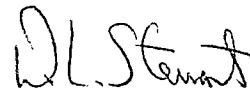

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY  
SURRY POWER STATION UNIT NOS. 1 AND 2  
NUREG-0737 ITEM II.D.3

In our letter dated July 29, 1983 (Serial No. 045A), Veeco informed you that the acoustical monitoring system for direct indication of relief and safety valve position, (NUREG-0737, Item II.D.3) would be undergoing a retest program. This was due to the failure of certain components during seismic and environmental testing. The completion of the retest program was scheduled for November, 1983 with issuance of the final report in January, 1984.

Veeco has been informed by Babcock and Wilcox that the retesting program has been delayed. The delay is in the LOCA testing portion of the program. Veeco will have the acoustical monitoring system for direct indication of relief and safety valve position seismically and environmentally qualified and installed in accordance with the final Environmental Qualification Rule.

Very truly yours,

W. L. Stewart
