**Regulatory Docket File**

**50-244**

Mr. Ben C. Rusche, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Subject: Proposed Annual Report Model of December 1, 1976

Dear Mr. Rusche:

Rochester, in review of the above proposed model annual operating report, agrees with the intent of a uniform report content and arrangement. We do have further comment on the contents as follows.

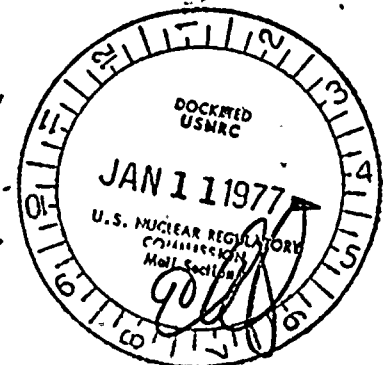

We agree with the inclusion of only those procedure changes which have required NRC approval. The periodic review of the other hundreds of procedures in effect results in weekly changes and actually accounted for some 168 pages of the 234 page report submitted for the year 1975.

As an attempt to reduce redundancy in reporting, we would omit from this report the mass of data collected in such operations as steam generator eddy current testing, fuel sipping, containment testing, to mention a few, where full reports have been submitted under separate cover previous to the annual report. We would suggest, instead, a summary with the appropriate report referenced accordingly.

Excepting with the suggested condensation of the preceding paragraph and in recognition of the plant's present Technical Specifications requirements Rochester will submit the Ginna Station 1976 Annual Operating Report in the format of the model.

Very truly yours,

*L. D. White, Jr.*  
L. D. White, Jr.
