[Supplement 29.pdf](#)

---

Dear Michelle and Donna,

In response to a letter from Pamela Henderson dated January 24, 2017, I am attaching changes to Maryland regulations made as a result of NRC review of Maryland's adoption of RATS 2015-1, 2015-2, 2015-3, 2015-4, and 2015-5 in our Supplement 28 to COMAR 26.12.01.01 "Regulations for the Control of Ionizing Radiation (1994)." These revisions are found in Supplement 29 to COMAR 26.12.01.01, which is effective today.

I am attaching a redline/strikeout version of Supplement 29 which shows which changes were made, and a final .pdf copy (with the Effective Date of May 21, 2018) which is the published copy. I am also sending a letter to Pamela Henderson with the published version of Supplement 29.

Please do not hesitate to contact me if you have any questions or concerns.

Sincerely,

---
