SUBJECT: CHARLOTTE HUNGERFORD HOSPITAL, CONSENT TO TRANSFER
LICENSE, MAIL CONTROL NO. 602539

Dear Mr. McIntyre:

By letter dated February 23, 2018 (ML18067A298), Charlotte Hungerford Hospital submitted to the U.S. Nuclear Regulatory Commission (NRC) a request for consent to an indirect license transfer of NRC Materials License No. 06-08349-04. Based on the information provided, the NRC understands that Hartford Healthcare Corporation (HHC) became the sole corporate member of Charlotte Hungerford Hospital. As such, control of Charlotte Hungerford Hospital was indirectly transferred to HHC, its new parent company. We further understand that this transfer will not result in any changes to the licensee name, licensed materials, persons using the licensed material, location of use, or persons responsible for the radiation safety program.

This was effectively a request for post-hoc approval of an indirect license transfer that occurred on January 1, 2018, without receiving written consent from the Commission. The NRC conducted an inspection at the Torrington, Connecticut locations on January 24, 2018, with telephonic exit meeting on March 29, 2018. The inspector determined that Charlotte Hungerford Hospital had attempted to send in a notification of the indirect transfer to the NRC Headquarters address on December 20, 2017, but did not wait for NRC's prior written approval in accordance with 10 CFR 30.34(b)(1). Because an attempt of a notification was made, this issue was not cited as a violation.

Based on the above understandings, as more fully detailed in the enclosed Safety Evaluation Report, which documents the NRC staff's review of the request, and in accordance with 10 CFR 30.34, the NRC consents to the transfer. Please note that since this transaction occurred on January 1, 2018, no other action is required. If you have any questions regarding this letter, please contact me at (610) 337-5006 or by e-mail at janice.nguyen@nrc.gov.

Future changes in the licensee's name, licensed use, licensed materials, licensed location, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

D. McIntyre
