OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission ("the Commission"), Rochester Gas and Electric Corporation hereby requests that the Technical Specifications set forth in Appendix A to Provisional Operating license No. DPR-18 be amended. Specifically, Rochester requests that Figure 6.2-1 and Figure 6.2-2 of Technical Specifications be amended to reflect revisions to the station staff and station management organization.

The proposed technical specification changes are set forth in Attachment A to this application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed changes do not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility.

WHEREFORE, Applicant respectfully requests that Figure 6.2-1 and Figure 6.2-2 of Appendix A to Provisional Operating License No. DPR-18 be amended in the form attached hereto as Attachment A.

Safety Evaluation for proposed change to Figure 6.2-1 and
Figure 6.2-2 -- Technical Specifications

~~Revised Safety Evaluation~~ 1-30-76

The proposed change does not constitute any significant hazards consideration, as the change, which results from recent establishment of new station positions and the assignment of technical support responsibilities to additional Company organizations, does not degrade the management control of Ginna Station.
