JUN 0 6 1985

Virginia Electric and Power Company ATTN: Mr. W. L. Stewart, Vice President Nuclear Operations P. O. Box 26666 Richmond, VA 23261

Gentlemen:

SUBJECT: EVALUATION OF SITE FOR THE ESTABLISHMENT OF THE VHF RADIO

COMMUNICATION SYSTEMS

The U. S. Nuclear Regulatory Commission has entered into an arrangement with Boise Interagency Fire Cache (part of the Department of Interior) for Boise to evaluate nuclear power plant sites for the establishment of an emergency VHF radio system. This radio system, if installed, will be used as a supporting and backup communications means by the NRC in emergency situations. Your Surry site has been selected for evaluation on June 11, 1985.

Members of Boise Interagency Fire Cache will require escorted access while visiting your facility. Preferably this escort should be someone who is familiar with communications systems. Boise's access will be limited to emergency response facilities and the surrounding site.

Sincerely,

Virgil L. Brownlee, Chief Reactor Projects Branch 2 Division of Reactor Projects

cc: J. I. Oatts, Chief Operating Officer

W. S. Mistr, Manager - Security R. F. Saunders, Station Manager

bcc: Document Control Desk

Commonwealth of Virginia NRC Resident Inspector
