License Nos. DPR-32
DPR-37

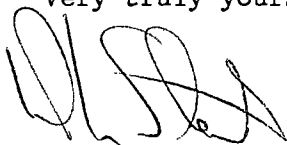

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNIT NOS. 1 AND 2
PROPOSED TECHNICAL SPECIFICATION CHANGES-CORRECTION

VEPCO letter, Serial No. 85-229, dated April 12, 1985, proposed Technical Specification changes to revise the Limiting Conditions for Operation and surveillance requirements for the reactor trip bypass breakers, undervoltage trip logic and shunt trip logic. The proposed changes were modified by our letter, Serial No. 85-229A, dated September 9, 1985, to include subsequent NRC guidance provided by Generic Letter 85-09, "Technical Specifications for Generic Letter 83-28, Item 4.3".

In both of our letters, proposed revisions to page 4.1-8 (among others) were included. Unfortunately, we failed to note that two existing surveillance requirements on that page (Item Nos. 24 and 25) had been inadvertently deleted. A corrected page is attached. We notified the NRC Surry Project Manager of this oversight on September 23, 1985.

Very truly yours,

W. L. Stewart
