Mr. Donald F. Knuth, Director
Office of Inspection and Enforcement
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Knuth:

Re: St. Lucie Unit No. 1 - Docket No. 50-335
LPSI Pump Casing Leak During Construction

On November 1, 1974, Florida Power & Light Company forwarded an interim report in accordance with 10 CFR 50.55 (e), concerning a leak which was discovered in the casing of a low pressure safety injection pump on September 16, 1974. We advised you at that time that a final report would be submitted in approximately 90 days. We have just received this report from the vendor and are in the process of evaluating it and coordinating its review by the A-E. We expect to submit the final report to you by February 21, 1975.

Yours very truly,

Robert E. Uhrig
Vice President
