General Comment

We are in full agreement with Diane D'Arrigo's concerns about putting any kind of radioactive waste into a municipal landfill, "very low level" included! (See <http://www.cacemi.org/comment-to-the-regulatory-commission-by-may-15-2018/>)

When will people learn from the mistakes of their predecessors? Radioactivity doesn't go away!

Keep all nuclear waste under radioactive regulatory control! NO VLLW!

ITS RADIOACTIVE! Dont mix it with hazardous waste or regular trash! ISOLATE IT!

DONT PRETEND ITS NOT RADIOACTIVE!

PS - I was told on May 15, 2018, by David McIntyre of the NRC that comments are not due on low-level waste at this time, there would be a scoping comment period soon, but we're commenting anyway.
