Serial No. 86-365  
NO/PML/acm  
Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY  
SURRY POWER STATION UNIT NOS. 1 AND 2  
PROPOSED TECHNICAL SPECIFICATION  
REVISED AUDIT FREQUENCY OF THE STATION SECURITY PLAN

Pursuant to 10 CFR 50.90, Virginia Electric and Power Company requests an amendment, in the form of changes to the Technical Specifications, to Operating License Nos. DPR-32 and DPR-37 for Surry Power Station Unit Nos. 1 and 2.

The proposed change would revise the Audit Frequency of Surry Power Station's Security Plan to occur at least once per 12 months instead of 24 months. This change would make the requirements of the Technical Specifications consistent with the requirements of 10 CFR 73.40(d) and Station practice.

The proposed change has been reviewed and approved by the Station Nuclear Safety and Operating Committee and by the Safety Evaluation and Control Staff. As indicated in the attached Safety Evaluation, it has been determined that this request does not involve an unreviewed safety question as defined in 10 CFR 50.59 nor does it pose a significant hazards consideration as defined in 10 CFR 50.92.

We have evaluated this request in accordance with the criteria in 10 CFR 170.12. A voucher check in the amount of \$150 is enclosed as an application fee.

Very truly yours,

W. L. Stewart
