Good Morning Doug,

It was a pleasure meeting you and having the opportunity to discuss the proposed LAR changes for Limerick and Peach Bottom.

As Rich had previously state in his response, we have no concerns at this time. We will conduct a formal review with the Bureau of Radiation once the proposed amendments have been issued and will submit our input as part of the NRC's review and approval process.

Subject: FW: Exelon Staffing License Amendment Request

Rich and Alan,

First off, I want to thank you for your time last week to discuss Exelon's proposed ERO License Amendment Request (LAR). I discussed your comments with Kim Aleshire and Larry Baker and we have decided to make a change to our Fleet LAR to include the EOF Computer Specialist as Minimum Staff. With the implementation of the LAR, we will upgrade our current Full Augmentation position to a Min Staff position that will be committed to respond within 90 minutes of a declared Alert or higher EAL classification.

I will be providing you both a copy of our PBAPS and Limerick LARs as soon as they are drafted.

Also, as discussed, I am attaching examples of the correspondence we received from Iowa and Illinois regarding the review of the License Amendment Request.

If you have any additional concerns or questions, please don't hesitate to reach out.

Doug Walker
Sr. Emergency Preparedness/Security Regulatory Analyst

Hello Doug,

Thank you for the opportunity to review and discuss the proposed changes to on-shift staffing requirements for Exelon's Limerick and Peach Bottom plants.

We do not have any concerns at this time however, we will conduct a formal review of the proposed amendments in accordance with the established protocol and will provide input into the NRC review and approval process as needed.

Regards,

Rich Janati, Chief
Division of Nuclear Safety
PA Bureau of Radiation Protection
Dept. of Environmental Protection

Glenn,

We have reviewed the proposed LAR for Peach Bottom's emergency response plan staffing. MEMA is fine with the proposed changes.

Thanks,

All,

PBAPS is developing a License Amendment to align their on-shift staff and Emergency Response Organization to align with guidance the NRC is developing for NUREG 0654 Rev 2. The changes must be reviewed and approved by the NRC before we can implement them. The NRC would like us to share the changes with the affected States prior to submittal and obtain and address any comments they may have.

I have been asked to provide the State of Maryland this attached “draft” copy of Exelon’s License Amendment Request for PBAPS and request an email or letter acknowledging that you had the opportunity to review the draft License Amendment Request and provide

comments. If you have no comments, it would be appreciated that be noted as well.

If possible we would like to have your response no later than March 27th to support our NRC submittal date. If you have any questions concerning the changes you can address them to Doug Walker, who is copied on this email. If necessary, Doug is willing to meet with you and provide a presentation.

As an example, included below is the email response from Pennsylvania to give you an idea of what we are looking for.

Thank you for your assistance in this matter.
