Josh----- You described it better than I could have. I wish I had explained the reason for the denial better at the time. The only suggestion I could make on the section is to move the section title to the top of the next page with the text for Section III.

I also took a quick look at the entire document. It is very well written. Please let me know the outcome of the response to UCS and any followup action.

Subject: UCS SL Issue - DSS Assessment

Hi Jim – Here is a safety assessment that I put together regarding the Union of Concerned Scientists letter on the BWR SL issue. Can you please take a look at Section III to make sure appropriately captured the staff's thoughts at the time?

Thanks.
