NUCLEAR FUEL-AMERICAS (ENTERPRISE PROJECT IDENTIFICATION
L-2018-LLA-0139)

Dear Mr. Murray:

By letter dated May 10, 2018 (Agencywide Documents Access and Management System [ADAMS] Accession Number ML18131A063), you provided a License Amendment Request for Chapter 5 of the Global Nuclear Fuels – Americas license application, “Nuclear Criticality Safety” along with other minor administrative amendments to five other chapters.

The U.S. Nuclear Regulatory Commission (NRC) staff has performed an acceptance review of your submittal to determine if the application contains sufficient technical information to allow the NRC staff to conduct the detailed technical review. Based on this review, completed May 24, 2018, the NRC staff concludes the submittal contains information in sufficient detail to enable the staff to conduct its detailed review. Accordingly, the NRC staff has established a schedule for this review which includes the issuance of requests for additional information (RAIs) by July 15, 2018. The NRC staff anticipates completing its review and developing a Safety Evaluation Report to address the submittal by the end of October 2018 or 4 weeks after adequate response to any RAIs, if any. In addition, the NRC staff estimates that completing the review and making an independent assessment of the proposed application will require approximately 80 staff hours.

In accordance with Title 10 of the *Code of Federal Regulations*, Section 2.390 of the NRC’s “Agency Rules of Practice and Procedure,” a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC’s ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
