General Comment

It is time to live by your conscience rather than your fear of loss of job security. .
You know as well as the rest of us that burying this nuclear waste at our shoreline is setting the stage for a colossal disaster that will ruin the lives of millions for generations to come. Do not shirk your responsibility to our shared host planet - the source of Life Itself! Halt the burial and use your vast resources to come up with a sustainable solution for the sake of us all.
