General Comment

Docket ID NRC-2018- 0052

To NRC:

I strongly and respectfully demand NRC hold a hearing in the greater Albuquerque community about a de facto permanent surface storage "parking lot dump" at Holtec/ELEA in s.e. NM. It would only increase safety risks. It would not decrease them.

It would multiply transport risks, as it would only be temporary (supposedly, even if decades, or centuries, or more, can be called "temporary"!). All that highly radioactive waste would have to move again, so transport corridor communities could see these high risks coming and going!

And Holtec/ELEA's assumption that another permanent burial dump will be opened, by someone, somewhere, someday, somehow, is also inappropriate. After all, the search for a national geologic repository has gone on since the 1950s but has failed.

Sincerely,

Walter Polt
