Gentlemen:

SUBJECT: ENFORCEMENT CONFERENCE SUMMARY  
(NRC INSPECTION REPORT NOS. 50-280/86-12, 50-281/86-12,  
50-338/87-32, 50-338/87-38, 50-339/87-32, AND 50-339/87-38)

This letter refers to the Enforcement Conference held at our request on January 21, 1988. This meeting concerned activities authorized for your Surry and North Anna facilities.

The issues discussed at this conference related to equipment qualification problems at both North Anna and Surry. Also discussed were the violation of a Technical Specification Limiting Condition of Operation where two inoperable steam flow instruments were not placed in the trip condition within the allotted time and problems encountered during recent startups after outages at North Anna. A summary, a list of attendees, and a copy of your handouts are enclosed.

With respect to the recent North Anna events, we share your concern with the lack of sensitivity by operations personnel and management on making timely decisions for nonconforming conditions. We are continuing our review of these issues to determine the appropriate enforcement action.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this matter, please contact use.

Sincerely,
