Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNITS 1 & 2
PROPOSED TECHNICAL SPECIFICATION CHANGE
CONTAINMENT PERSONNEL HATCH

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requests an amendment in the form of a change to the Technical Specifications to Operating Licenses DPR-32 and DPR-37 for Surry Power Station Units 1 & 2 respectively. The change, Attachment 1, will allow entry into the containment personnel airlock during power operations to make repairs on the inner door of the personnel airlock. In addition, the definition of Containment Integrity has been revised to clarify the actions for an inoperable automatic containment isolation valve.

This change has been reviewed by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control staff. It has been determined that the change does not involve an unreviewed safety question as defined in 10 CFR 50.59 or a significant hazards consideration as defined in 10 CFR 50.92. Our basis for determining that no significant hazards consideration exists is contained in Attachment 2.

We have evaluated this request in accordance with the criteria of 10 CFR 170. A voucher check in the amount of \$150.00 is enclosed as an application fee.

Very truly yours,

D. S. Cruden
Vice President - Nuclear
