License Nos. DPR-32, DPR-37

Virginia Electric and Power Company
ATTN: Mr. D. S. Cruden, Vice President,
Nuclear Operations
P. O. Box 26666
Richmond, VA 23261

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-280/88-26 AND 50-281/88-26

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by W. E. Holland and L. E. Nicholson on June 5 through July 2, 1988. The inspection included a review of activities authorized for your Surry facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. However, after discussions between the inspectors and NRC regional management, it was concluded that adequate corrective actions to prevent recurrence had been taken by the licensee prior to the end of the inspections. Therefore, no written response is required to the enclosed Notice of Violation.

Your attention is invited to unresolved items identified in the inspection report. These matters will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
