SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-280/99-03, 50-281/99-03

Dear Mr. O'Hanlon:

On May 22, 1999, the NRC completed an inspection at your Surry Power Station Units 1 and 2. The enclosed report presents the results of that inspection.

During the six-week period covered by this inspection period, your conduct of activities at the Surry facilities was generally characterized by safety-conscious operations, sound engineering and maintenance practices, and careful radiological work controls.

Based on the results of this inspection, the NRC has determined that two violations of NRC requirements occurred. The violations are being treated as Non-Cited Violations (NCVs), consistent with Appendix C of the Enforcement Policy. The NCVs are described in the subject inspection report. If you contest these violations or the severity level of the NCVs, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the United States Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555-0001, with a copy to the Regional Administrator, Region II, and the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, D.C. 20555-0001.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Sincerely,

Orig signed by Robert C. Haag
