50-281

Dear Mr. Daley:

This letter is being submitted pursuant to 40 CFR 61.150 (d)(4) and in accordance with your letter dated July 1, 1994 confirming that Virginia Power's procedure for tracking low-level radiologically contaminated asbestos waste (RCAW) is acceptable for maintaining compliance with the National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations. This is official notification that Surry Power Station (1) has not received a copy of a waste shipment record (WSR), signed by the owner or operator of the designated waste disposal site within 35 days since the waste was shipped off-site (inquiry requirement time period) and (2) will not receive the WSR within 45 days (notification requirement time period).

On December 12, 1997, RCAW (Shipment S-97-6) was shipped from Surry Power Station to GTS Duratek. The intermediate processor's name is identified as Scientific Ecology Group on Line 8 of the form, but the company's name recently changed to GTS Duratek (a copy of the asbestos waste shipment record is attached for your review). Once the interim process is complete, the waste will be shipped to Barnwell Waste Management Facility in Barnwell, South Carolina for final burial (see Line 3). The interim process is taking longer than expected and the signed waste shipment record was not returned to Surry Power Station within 35 days. Therefore, a search was initiated to determine the status of the waste shipment.

On January 20, 1998, the 35th day (excluding the four Federal Holidays), Surry Power Station inquired to GTS Duratek about shipment S-97-6 and was informed by GTS Duratek in a telephone conversation that the waste shipment will be processed after the 35th day and will not be buried until after January 30, 1998, the required 45th reporting date. The waste shipment is still located at GTS Duratek. A copy of a written notification dated January 22, 1998, from GTS Duratek to Surry Power Station was forwarded to Virginia Power's Environmental Policy and Compliance Department and is attached for your review.

Once Surry Power Station receives the waste shipment records, and the signed original from Barnwell, the Environmental Policy and Compliance Department will be notified and then will notify the Environmental Protection Agency that the outstanding WSR has been received and closed.

Jim Keithley
 Virginia Power, Surry
 5570 Hog Island Road
 Surry, VA. 23883

Dear Mr. Keithley:

In compliance with the requirements of 10 CFR 20, Appendix F, Section III, C.1, the attached signed shipping manifest copies are your notice of receipt and acceptance of the radioactive waste materials specified on the manifests.

Manifest Number
 241-S97-6

Date Received
 12/17/1997

This is acknowledgement of receipt only. Any manifest discrepancies found during manifest review, unloading or processing will be listed on page 2 of this letter.

Thank you for your business.

Sincerely,

A handwritten signature in black ink, appearing to read "Fred Schulz", written over a horizontal line.

Mr. Jim Keithly
Virginia Power Company
Surry Power Station
P.O. Box 315
Surry, VA 23883

Dear Mr. Keithly:

As you requested, this correspondence will serve as written documentation regarding the status of asbestos shipped to our Oak Ridge, TN, facility on December 17, 1997, Manifest No. 241-S97-6. Because our processing schedule is determined at least 30 days in advance, and since we compact asbestos on campaigns, your asbestos will not be buried within the requested 45 days of our receipt, or January 30, 1998.

Please call me at (423) 220-1613 if I may be of additional assistance.

Sincerely,

A handwritten signature in cursive script that reads "Sherry K. Fleming".

Sherry K. Fleming
Account Executive
