

June 1, 1998

Virginia Electric and Power Company  
ATTN: Mr. J. P. O'Hanlon  
Senior Vice President-Nuclear  
Innsbrook Technical Center  
5000 Dominion Boulevard  
Glen Allen, VA 23060

SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-280/98-04, 50-281/98-04,  
AND NOTICE OF VIOLATION

Dear Mr. O'Hanlon:

On, May 2, 1998, the NRC completed an inspection at your Surry Units 1 and 2 reactor facilities. The enclosed report presents the results of that inspection.

During the six-weeks covered by this inspection period, your conduct of activities at the Surry facilities was generally characterized by conservative operational decision making, sound engineering judgement, good maintenance practices, and adequate radiological work controls. A violation was identified concerning a one-time-only revision to an operating procedure which failed to properly incorporate additional controls for a non-standard plant configuration. Management directed that these controls be implemented.

The violation is cited in the enclosed Notice of Violation (Notice), and the circumstances surrounding the violation are described in detail in the enclosed report. Please note that you are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. The NRC will use your response, in part, to determine whether further enforcement action is necessary to ensure compliance with regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Sincerely,

Orig signed by Robert C. Haag

100055

Robert C. Haag, Chief  
Reactor Projects Branch 5  
Division of Reactor Projects
