Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNITS 1 AND 2
RELOCATION OF FIRE PROTECTION TECHNICAL SPECIFICATIONS
ADMINISTRATIVE CORRECTION

By letter dated September 12, 1996 (Serial No. 96-104A), Virginia Electric and Power Company requested license amendments for Surry Power Station Units 1 and 2 to relocate the fire protection Technical Specifications (TS) to the Updated Final Safety Analysis Report. Attachment 3 provides a retyped version of the affected section of Technical Specifications including the proposed change.

Editorial corrections have been identified to Attachment 3 to address a missing revision bar and a pagination error. Corrected pages TS 6.1-3 and TS 6.1-8 are attached for direct replacement to correct these two administrative errors. These editorial corrections do not affect our proposed change request provided in Attachment 2 of the letter referenced above. Consequently, the results of the original significant hazards consideration determination remain valid.

No new commitments are intended as a result of this letter. Should you have any questions or require additional information, please contact us.

Very truly yours,

230056

S. P. Sarver, Acting Manager
Nuclear Licensing and Operations Support
