

VIRGINIA POWER

March 18, 1996

Mr. John Daley (3AT33)
U. S. Environmental Protection Agency
Region III
841 Chestnut Street
Philadelphia, Pennsylvania 19107

50-28/281

Dear Mr. Daley:

This letter is being submitted pursuant to 40 CFR 61.150 (d)(4) and in accordance with your letter dated July 1, 1994 confirming that Virginia Power's procedure for tracking low-level radiologically contaminated asbestos waste (RCAW) is acceptable for maintaining compliance with the National Emissions Standards for Hazardous Air Pollutants (NESHAP) regulations.

On January 23, 1996, Virginia Power issued a letter to your attention informing you that the Surry Power Station had not received a copy of the waste shipment record for shipment S-95-11 signed by the owner or operator of the designated waste disposal site, within the 45 days since the waste was shipped off-site.

On December 8, 1995, shipment S-95-11 was shipped from Surry Power Station to Scientific Ecology Group, Incorporated (SEG), for interim processing. The interim process took longer than expected and the signed waste shipment record was not returned to Surry Power Station within the required 35 days. On January 16, 1996, the 35th day (excluding the three Federal Holidays), Surry Power Station received written notification that shipment S-95-11 had reached SEG and would be processed and buried by the end of February 1996 (after January 26, 1996, the 45-day reporting requirement).

However, on March 4, 1996, the waste shipment record for shipment S-95-11 was signed by Barnwell Waste Management Facility, the waste disposal site owner or operator.

A copy of the signed original waste shipment record for shipment S-95-11 was received by the Surry Power Station on March 12, 1996, and a copy is attached for your review. Therefore, Virginia Power considers this matter concerning shipment S-95-11 officially closed.
