**RE: SURRY POWER STATION - VMRC PERMIT # 92-1347**

Dear Mr. Grabb:

The subject permit that authorizes maintenance dredging of the intake area at Surry Power Station expires on December 31, 1995. We request that the permit be extended to allow continued maintenance dredging activity in the future. All proposed activities under the license will remain the same as previously authorized and no changes in the applicable conditions of the license are requested.

The current permit was issued for a period of three years on December 22, 1992. Surry Power Station is presently licensed to operate through January 29, 2013. The need to periodically dredge the intake area will be continual during the ensuing period. It is therefore requested that the permit for this maintenance dredging be extended by the maximum permissible time frame.

Should you desire additional information or have any questions, please contact Daniel James at (804)273-2996.

Sincerely,

J. W. White
