Glen Allen, VA 23060

Gentlemen:

SUBJECT: SURRY SYSTEMATIC ASSESSMENT OF LICENSEE PERFORMANCE  
(NRC INSPECTION REPORT NOS. 50-280/93-16 AND 50-281/93-16)

The NRC Systematic Assessment of Licensee Performance (SALP) has been completed for your Surry facility. The facility was evaluated for the period April 5, 1992, through July 3, 1993. The results of the evaluation are documented in the enclosed Initial SALP Report. This report will be discussed at a public meeting to be held at the Surry facility on September 14, 1993, at 10:00 a.m.

The performance of your Surry facility was evaluated in the functional areas of Plant Operations, Radiological Controls, Maintenance/Surveillance, Emergency Preparedness, Security, Engineering/Technical Support and Safety Assessment/Quality Verification.

The assessment indicates that your staff continued to maintain superior performance in the areas of Plant Operations, Radiological Controls, Emergency Preparedness, and Security. The report also recognizes your staff's improving performance in the Safety Assessment/Quality Verification area and the improving trend in the Maintenance/Surveillance area. Good performance was maintained in the Engineering/Technical Support area. Examples of areas for improvements include elimination of transients caused by equipment problems and resolution of issues arising from setpoint calculation control.

Any comments you have concerning our evaluation of the performance of your Surry facility should be submitted to this office within 30 days following the date of our meeting. Your comments will be considered in the development of the Final SALP Report and will be issued, along with a summary of our meeting, as an appendix to the Final SALP Report.
