Surry

Docket Nos. 50-280 and 50-281  
License Nos. DPR-32 and DPR-37

During the Nuclear Regulatory Commission (NRC) inspection conducted on April 3-7, 1989, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1989), the violation is listed below:

10 CFR 50, Appendix E (IV) requires that the applicant's emergency plans shall contain information needed to demonstrate compliance with the elements set forth below, i.e., ... activation of emergency organization, notification procedures, etc. Table 5.1 of the Emergency Plan titled Minimum Shift Manning Requirements lists the major Functional areas, Major Tasks, Position Title, and approximate response times for Emergency Personnel to augment on shift personnel.

Contrary to the above, based on results from the annual exercise (November 1988), quarterly call-out drill (January 1989), and a remedial exercise (February 1989) that included as an objective the demonstration of augmentation capability, the licensee did not meet augmentation staffing requirements within the times set forth in Table 5.1 of the Surry Emergency Plan.

This is a Severity Level IV violation (Supplement VIII)

Pursuant to the provisions of 10 CFR 2.201, Virginia Power is hereby required to submit a written statement or explanation to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, within 30 days of the date of the letter transmitting this Notice.
