Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNITS 1 AND 2
RADIOLOGICAL EFFLUENT TECHNICAL SPECIFICATION CHANGES
RESPONSE TO GENERIC LETTER 89-01

Pursuant to 10CFR50.90, the Virginia Electric and Power Company requests amendments, in the form of changes to the Technical Specifications, to Operating License Nos. DPR-32 and 37 for Surry Power Station Units 1 and 2, respectively.

The proposed changes, a discussion of the changes and the 10 CFR 50.92 evaluation are provided in Attachments 1, 2 and 3 respectively. The proposed changes are based on NRC Generic Letter 89-01 dated January 31, 1989. These changes relocate the Radiological Effluent Technical Specifications to the Offsite Dose Calculation Manual (ODCM) or the Process Control Program (PCP), as appropriate (Attachments 4 and 5). Note that these are the same as Attachments 5 and 6 to our May 21, 1990 letter, serial number 90-234, requesting similar Technical Specifications changes for North Anna.

This request has been reviewed by the Station Nuclear Safety and Operating Committee. It has been determined that this request does not involve any unreviewed safety questions as defined in 10CFR50.59 or a significant hazards consideration as defined in 10CFR50.92.
