Serial No. 90-195A  
NO/ETS  
Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Gentlemen:

**VIRGINIA ELECTRIC AND POWER COMPANY**  
**SURRY POWER STATION UNITS 1 AND 2**  
**CORRECTED PAGES FOR ENGINEERED SAFEGUARDS ACTION**  
**INSTRUMENT OPERABILITY AND SURVEILLANCE REQUIREMENTS**  
**PROPOSED TECHNICAL SPECIFICATION CHANGE**

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requested amendments, in the form of changes to the Technical Specifications, to Operating Licenses No. DPR-32 and DPR-37 for the Surry Power Station Units 1 and 2 respectively on November 8, 1990. Since this Technical Specification change request was submitted to your office, Amendment Nos. 155 and 154 for Units 1 and 2, respectively, were issued. This amendment affected the page number of several pages of the proposed change request. In addition, a typographical error was identified in Table 3.7-2, page 3.7-14. The corrected pages with the instructions for replacement are included as an attachment to this letter.

The original request was reviewed and approved by the Station Nuclear Safety and Operating Committee. It was determined that the proposed changes do not involve a significant hazards consideration as defined in 10 CFR 50.92. The renumbering of the pages and the typographical error have not changed the basis for our no significant hazards consideration determination. Thus the significant hazards consideration determination presented with the original request remains valid.

Very truly yours,

W. L. Stewart  
Senior Vice President - Nuclear
