ACRS(10)	M. Sinkule, RII

Dear Mr. Stewart:

SUBJECT: RESPONSE TO GENERIC LETTER 91-11, "RESOLUTION OF GENERIC ISSUE 48, 'LCO'S FOR CLASS 1E VITAL INSTRUMENT BUSES,' AND 49, 'INTERLOCKS AND LCO'S FOR CLASS 1E TIE BREAKERS,' PURSUANT TO 10 CFR 50.54(f)" FOR SURRY POWER STATION, UNITS 1 AND 2 (TAC NOS. M82474 AND M82475)

On July 18, 1991, the Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 91-11 which contained the staff resolution of Generic Issues 48 and 49. The GL required that licensees certify that procedures exist which contain time limitations and surveillance requirements for vital instrument buses (VIBs), inverters or other onsite power sources for VIBs, and tie breakers. If procedures do not exist, a justification demonstrating the reasons why the controls are not needed is required.

By letter dated January 31, 1992, you responded to the GL. You indicated that administrative controls and procedures are in place.

The staff has reviewed your response and finds that it meets the reporting requirements set forth in GL 91-11. This completes the staff's activities on TAC Nos. M82474 and M82475.

Sincerely,  
(Original Signed By)  
Bart Buckley, Senior Project Manager
