Dear Ms. Ma,

I am 83 and have lived near Los Alamos for 30 years - 60 miles downwind from Los Alamos. For about that long I have worked to stop PIT production and cleanup proper at Los Alamos.

I am writing to implore you not to bring the country's nuclear waste to New Mexico. Moving it would be very dangerous. And really, no one knows exactly what should be done with it further LANL may have ruined forever WIPP using the wrong tiny little in their waste - one of their many accidents. Every state should have figure out their waste problems - not easy + very expensive.

(We must go solar/wind)

Sincerely,
Jean Richards
