Re: Docket ID NRC-2018-0052 Holtec International's HI-STORE Consolidated Interim
Storage Facility Project for Spent Nuclear Fuel in Lea County, New Mexico

Dear NRC Representative: WE DO NOT CONSENT!

Fracking in the Permian basin is booming.
The structural integrity of the substrate is now
compromised. Look at the earth tremor situation in
Oklahoma, and you can see how easily the drilling
of holes and the explosion of shale layers can
change the pressure dynamic within the earth's
"skin". How foolish to add to the mix nuclear
waste products that could seriously disrupt if not
destroy life in eastern New Mexico.
