CITATION: 83 FR 13802

May 16, 2018

Dear Commission,

I am writing you to ask you not to store High-Level Radioactive Nuclear waste in Eddy and Lea Counties New Mexico. Many think this area is just a vast wasteland, but it is strategically important to this nation with its oil and gas reserves, including the Permian Basin.

Storage of nuclear waste is too risky a proposition for such an important area. Any mistake in initial planning or later human error could risk the nation's energy reserves, not to mention the water supply, property, and livelihoods of thousands of people. This area has shown to be subject to sinkholes and other instabilities.

Please reconsider.

Sincerely yours,  
Rhonda Bailey
