Mattawan, MI 49071

SUBJECT: REQUEST FOR CONSENT TO INDIRECT LICENSE TRANSFERS

Dear Mr. Granberg:

By letter dated March 12, 2018, MPI Research, Inc., submitted to the U. S. Nuclear Regulatory Commission (NRC) a Request for Consent to Indirect License Transfers of NRC Materials License Nos. 21-11315-02 and 21-11315-04. Based on the information you provided, along with additional information provided by you in letter dated March 29, 2018, we understand that as a result of a merger of ACP Mountain Holdings, Inc. (parent of MPI Research, Inc.) and Charles River Laboratories International, Inc., control of the MPI Research, Inc. was transferred to the new parent holding company, Charles River Laboratories International, Inc. We further understand that this transfer did not result in any change to the licensed material, persons using the licensed material, locations of use of licensed material, or persons responsible for the licensee's radiation safety program.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Reports which document the NRC staff's review of the requests, we have no objection to the transfers. It is our understanding that the effective date of the transfers was April 3, 2018. By letters dated April 3 and 4, 2018, you provided confirmation that this transaction was finalized and included a signed copy of the agreement of the completed transaction.

With this information, we have issued Amendment No. 42 to your NRC License No. 21-11315-02 and Amendment No. 05 to your NRC License No. 21-11315-04 to reflect the transaction.

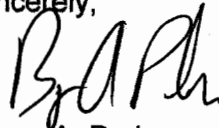

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Bryan A. Parker
Senior Health Physicist
