General Comment

It is heinous to even consider keeping spent fuel in casks that may last only forty years. Not only is the integrity of these casks in question, but their storage in an area riddled with earthquake fault lines, and only a few hundred feet from the Pacific Ocean is fraught with risks. If the NRC did a thorough community assessment as outlined in Homeland Security's IS-800 this would be obvious. The threat to our military bases located throughout the county should be a huge red flag. I wholeheartedly support Mr. Ray Lutz's proposals.

Sincerely,
Deanna L. Polk RN, MSHS (Masters of Science in Homeland Security)
