General Comment

RE Docket NRC-2018-0017: I am in agreement with the Citizens Oversight Inc. on this rule. Pay what it takes for the best containers to be made, and then get really busy developing a permanent storage location. Ideally this would be in the state where the spent fuel is generated. There are a multitude of potential problems that could arise whether it be a natural disaster, a leakage, or even an attack on the housed spent fuel. Please act quickly to shore up against these challenges. Thank you.
