PUBLIC SUBMISSION

Docket: NRC-2018-0017
Storing Spent Nuclear Fuel Waste

Comment On: NRC-2018-0017-0003
Requirements for the Indefinite Storage of Spent Nuclear Fuel

Document: NRC-2018-0017-DRAFT-0049
Comment on FR Doc # 2018-05776

Submitter Information

Name: Libby Frolichman

General Comment

It's only common sense to assure that something as dangerous as radioactive waste is stored in a manner that will protect us from disaster. Thin, single-walled casks with only a 40 year lifespan, is an obvious catastrophe in the making. Millions of people live in the area that would be affected if (and when) the 40-year canisters fail. Please use your own common sense and adopt the HELMS proposal. Anyone with even a rudimentary understanding of science knows that radioactive waste is dangerous for lifetimes (which is much longer than 40 years!).
