Subject: [External_Sender] San Onofre nuclear station concerns

To Whom It May Concern,

The storage canisters holding the nuclear waste at San Onofre are supposedly flimsy and already been recalled. I live in San Clemente, CA which is the nearest city with over 60K population near San Onofre nuclear station. I am concerned for all of us surrounding San Onofre that a disaster would occur and unable to be stopped. A permanent solution is needed urgently and not the failing temporary measures that may put us all at risk.

Thank you,

Joanna Mathews, San Clemente, CA
