## General Comment

The license shall not be approved for the reactors at turkey point without taking into consideration the cooling canals and the raise in sea levels. The company has been cited by the State of Florida and the Miami-Dade county for polluting the waters near by, and putting drinking water at risk of contamination. people lives are at risk of radioactive contamination, which can cause birth defects and many types of cancer if consume by any human and/or wildlife. In addition if there is a huge spill it will put the ecosystem at risk and affecting our tourism industry which is a major economic drive in Florida.
