Re: Holtec International's Hi-Store CIS Facility for
Spent Nuclear Fuel in Lea County, New Mexico
Docket ID NRC-2018-0052

NRC:

I respectfully submit my concerns for this project. My highest concern is that this is considered a "temporary" storage place for spent nuclear rods from nuclear power plants in various places in the United States. I have not heard any plans for the permanent storage place and a permanent place should be detailed out ahead of time so that everyone knows the plan. The long term plan must be worked out prior to transferring/transporting the used fuel. Otherwise "temporary" will become permanent. And I don't think it is fair to future generations to deal with it without a plan. We haven't had a plan since nuclear power plants were begun (a plan for the disposal of the used fuel rods).

Please do not transport ~~there~~ the radioactive waste at this time. Make a permanent plan first.

Sincerely,

Ronda Suderman King
