

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

July 9, 2018

MEMORANDUM TO: Thomas H. Boyce, Chief  
Regulatory Guidance and Generic Issues Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

FROM: Edward O'Donnell /RA/  
Regulatory Guidance and Generic Issues Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

SUBJECT: SUMMARY OF JUNE 5, 2018 PUBLIC MEETING ON DRAFT  
REGULATORY GUIDE (DG)-1327 "PWR CONTROL ROD  
EJECTION AND BWR CONTROL ROD DROP ACCIDENTS"

Enclosed is a summary of a public meeting held on DG-1327, "PWR Control Rod Ejection and BWR Control Rod Drop Accidents," at NRC Headquarters on June 5, 2018. A previous public meeting was held on January 25, 2017 while the guide was open for public comment. At the first public meeting the NRC staff made two commitments:

- At the close of the public comment period the NRC staff will address the formal comments submitted by the public.
- Following analysis of the public comments but before finalization of the guide, the staff will plan to hold a public meeting to discuss the staff's proposed resolution of key comments.

This meeting was to address the two commitments. The staff used "Go to Meeting" and a telephone bridge line to facilitate public participation for those not able to be present at NRC headquarters. There were 25 participants at NRC headquarters and approximately 20 people participated via "Go to Meeting" or the telephone bridge line. Attached are the list of participants, the agenda, and a handout from the Nuclear Energy Institute (NEI) which served as a basis for discussion.

Paul Clifford (NRC/NRR), the technical lead for the draft guide opened the meeting with the ground rules and announced that there would be ample opportunity for the public to comment. He alerted those participating that the guide would be released for a second round of public comments. He is working toward completing revision of the guide late in the fourth quarter of Quarter 4, FY 2018 and issuance for public comment would be in the first quarter of FY 2019. He was supported by Edward O'Donnell (NRC/RES) who handled meeting logistics.

Enclosures:  
As stated
