SUBJECT: SUMMARY OF ANNUAL ASSESSMENT MEETING WITH ENTERGY
OPERATIONS, INC., REGARDING 2017 PERFORMANCE OF
ARKANSAS NUCLEAR ONE

Dear Mr. Anderson:

This refers to the public meeting conducted at the Reeves E. Richie Training Center, Russellville, Arkansas, on May 31, 2018, between the Nuclear Regulatory Commission (NRC) and your staff. Approximately 100 people attended the public meeting, including members of the general public, with representatives from the Arkansas Bureau of Health, the Arkansas Democrat-Gazette, and the Russellville Courier.

During the meeting, the NRC presented the results of the annual assessment of safety performance at Arkansas Nuclear One for the period of January 1 through December 31, 2017, and discussed the completion of the Confirmatory Action Letter follow-up inspections, as well as the decision to return Arkansas Nuclear One to Column 1 of the Reactor Oversight Process Action Matrix. The NRC maintains a Web site to summarize the issues that resulted in the Column 4 assessment and the inspection process while Arkansas Nuclear One remained in Column 4 (<http://www.nrc.gov/info-finder/reactors/ano/special-oversight.html>).

During the meeting, your staff provided a presentation and responded to the NRC's assessment observations and exit meeting comments. During the public comment/question and answer portion of the meeting, the only question was directed to Arkansas Nuclear One and you responded.

Copies of the NRC and Arkansas Nuclear One presentations from the meeting is included as Enclosures 1 and 2, respectively.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Should you have any questions concerning this matter, we will be pleased to discuss them with you.

Sincerely,

Neil O'Keefe, Chief
Project Branch E
Division of Reactor Projects
