**Subject:** [External\_Sender] Lost Creek Excursion Notice SUA-1598

An excursion according to the NRC criteria (i.e. well specific UCLs) has been confirmed for well MO104 at the Lost Creek ISR Project (SUA-1598). The well is in the overlying horizon and therefore pursuant to LC 10.10 injection in the area will remain shut off. Mine Unit 1 is currently offline and injection wells in the vicinity of MO104 will be tagged out to make sure they remain off. Monitoring of MO104 will be increased to weekly. Additional details will be provided in the forthcoming 7-day Excursion Report.

Let me know if you have any questions. The well does not qualify for excursion status under the WDEQ-LQD criteria (i.e. well group UCLs).
