Subject: [External_Sender] Comments RE: Docket ID NRC-2018-0101 (License Renewal for FPL's Turkey Point)

Dear NRC Staff,

As a resident of South Florida, I am very concerned about the operation of Turkey Point until the early 2050s!! It will be underwater by that time, or very nearly!

(it has already experienced the negative effects of sea level rise and storm surges.)

It is currently using old technology that contaminates local aquifer!

(Please evaluate the pollution leaking from the cooling canal system and study alternative cooling technologies that could protect the environment, such as the installation of cooling towers)

The NRC needs to be aware that Turkey Point and the area around is extremely vulnerable to future flooding and impacts to emergency evacuation procedures and planning.

NRC must recognize Florida is the "SUNSHINE STATE" and as such should be encouraged to seek out solar solutions!

Thank you.

Sincerely,
Joan Bausch
