**Subject: Comments Concerning Draft Letter to the Nuclear Energy Institute Regarding the Clarification of Regulatory Paths for Lead Test Assemblies (83FR26503, dated June 7, 2018, Docket ID NRC-2018-0109)**

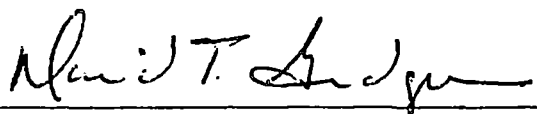

This letter is being submitted in response to the U.S. Nuclear Regulatory Commission (NRC) request for comments pertaining to a draft letter to the Nuclear Energy Institute (NEI) concerning clarification of regulatory paths for Lead Test Assemblies (LTAs). The NRC published in the *Federal Register* (i.e., 83FR26503, dated June 7, 2018) a notice of availability and opportunity for comment regarding the subject draft letter.

The draft letter would finalize the NRC's views on the preliminary positions regarding LTAs provided in an NEI letter dated June 29, 2017. These positions would affect light-water reactor licensees who wish to irradiate LTAs.

Exelon Generation Company, LLC (Exelon) appreciates the opportunity to comment regarding this request. Exelon supports the comments submitted by NEI on behalf of the industry related to the subject draft letter.

If you have any questions or require additional information, please contact Tom Loomis at (610) 765-5510.

Respectfully,

David T. Gudger  
Manager, Licensing and Regulatory Affairs  
Exelon Generation Company, LLC
