Dear Ms. Bailey:

The purpose of this letter is to submit SP-HQ-0008, *Centrus Energy Corp. Headquarters Classified Administrative Thin Client System Security Control Security Plan* and supporting document SP-HQ-0007, *Baseline Security Controls & Standards for Centrus Energy Classified Cyber Security Plans* for U.S. Nuclear Regulatory Commission (NRC) review and approval.

The current Centrus HQ cyber security plan SP-HQ-0002, *Centrus Energy Corp. Headquarters Classified Administrative Thin Client System Security Control Security Plan, Revision 1* credited certain baseline security control functions contained in the American Centrifuge Operating (ACO) cyber security plan SP-3605-0009, *American Centrifuge Classified Networks Baseline Security Control Security Plan*. With the decommissioning of ACO's Piketon, Ohio, facility and the change in status of the facility to non-possessing, the Centrus HQ plan, SP-HQ-0002, required updating to include the baseline security control functions previously credited from ACO's plan, SP-3605-0009. By letter dated January 25, 2018, (Reference 1), Centrus requested a 180-day Interim Authorization to Operate (IATO) to allow the Centrus HQ classified network to continue to operate while the HQ cyber security plan was updated. By letter dated February 1, 2018 (Reference 2), NRC approved the IATO.

~~Document herewith contains~~
