Subject: [External_Sender] RE: Montana State University License #25-00326-06; Docket #030-00871

Ms. Cook,

Please find the attached amendment request from Montana State University for the addition of the Molecular Biosciences Building (MBB) located at 960 Technology Blvd, Bozeman, MT 59718. Per our conversation yesterday we would like to request further time to consider the Safety and Risk Management Building located at 1160 Research Drive, Bozeman, MT 59718. We are requesting that this amendment be expedited as the lease of MBB is coming to an end and commitments have been made as early as August 1st of this year and our final site survey report will not be reviewed until this amendment has been approved. Please let me know that this request has been received and we appreciate your consideration of this time sensitive matter. If there are any questions please contact me directly.

Thanks for your time. – Nick

Subject: Montana State University License #25-00326-06; Docket #030-00871

Importance: High

Good Morning Dr. Childs: It has come to our attention that Montana State University must request an amendment to your license to add the Molecular Biosciences Building (MBB) as a separate location of use on the license and the risk management [something] building (not sure of the correct name of this building) (where radioactive waste from the labs are consolidated and stored; where radioactive material is used [performing leak tests, instrument calibration; where sealed sources are used and stored [portable gauges, ECDs]) also needs to be added as a separate location of use on the license because neither location is contiguous to Montana State University main campus and the MBB is not controlled but leased by the licensee, MSU. It will also make it easier to remove these separate locations of use from your license when you amend your license to release these buildings for unrestricted use in accordance with 10 CFR 30.36 when you submit the appropriate documentation (final status surveys, leak test results, etc.).

Please submit an amendment request to your license requesting both buildings (MBB and the risk management building [please specify the correct name for this building]) be added as separate locations of use under license condition 10. In accordance with 8.3., Item 3 of NUREG-1556, Volume 11, Revision 1, *Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Licenses of Broad Scope* (<https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v11/>), please specify the street address, city, and state or other descriptive address (e.g., Highway 10, 5 miles east of the intersection of Highway 10 and State Route 234, Anytown, State) for each permanent location at which licensed material will be used or stored. In addition, please provide a list of activities to be conducted at each location.

Please submit your amendment request in a **signed and dated letter in pdf format** if responding via email as soon as possible but no later than **Monday, July 9, 2018**, so we can proceed with reviewing your final status surveys for release of the MBB for unrestricted use.

Please do not hesitate to contact me at your convenience if you have any questions, require additional or further clarification regarding the above.

Sincerely,

Ms. Jacqueline "Jackie" D. Cook

Subject:

Expedited Amendment Request for Montana State University's Materials License 25-00326-06

Dear Jacqueline,

We would like to submit an expedited amendment request for our Broad Scope Type A License 25-00326-06. The amendment request is for adding a location of use to our license:

Molecular Biology Building (MBB)
960 Technology Blvd
Bozeman, MT 59718

All activities have ceased at this time and we are in the process of decommissioning the building. We are requesting that this amendment is expedited as our lease of this building is coming to an end. Commitments have been made as early as August 1st and our final site survey report for the location will not be reviewed prior to the approval of this amendment. If there are any questions regarding this amendment request, please contact me directly.

Sincerely,

Dr. Nicholas Childs
